

Quick-Step® Stainless Steel Pipe Cover

Product description

Wood is the main component of your Quick-Step® floor. Since humidity levels can vary – for example between summer and winter – the floor must be able to breathe and so should be allowed to expand and contract along all the sides. To allow for this, an 8 to 10 mm expansion joint is to be foreseen around the floor.

The Quick-Step® radiator pipe covers will allow you to finish off the joints around heating elements and pipes. Available in 15 mm or 22 mm inner diameter, both have a 54 mm outer diameter.

Features

- stainless steel, 1 mm thickness.
- 1 “click”-side: perfectly clicks together, no separate gluing required
- You can turn the joints towards the back side of the pipe: seamless look!

Product specifications

Quick-Step® Radiator pipe covers QSRCINOX15 / QSRCINOX22

1 PC = 2 covers

Dimensions 1 PC (packaging): 125x140x19 mm

Order quantity: per 1 PC
